

SECTION 33: Geographic Emergency - Aircraft Repositioning

- A. A "Geographic Emergency" means any event occurring naturally and/or that is man made, that would endanger life and/or property in an area where a maintenance facility, domicile, out-station, or any other facility which the Company must protect is located.
- B. The following geographic aircraft repositioning plan will be followed in order to provide the most expeditious means to protect life and Company property, when a Geographic Emergency is approaching, or is eminent:
1. The Company will maintain a standing list of Flight Attendants who agree to be available to volunteer when needed for the purposes of emergency aircraft repositioning.
 2. A Flight Attendant may request to be removed from the volunteer list. Such request shall be effective no later than fourteen (14) days after the submission date of the request. However, Flight Attendants on the volunteer list shall maintain their right to all schedule adjustment provisions as provided for in this Agreement.
 3. In the event there are insufficient volunteers to conduct a Geographic Emergency operation, the Company will assign Flight Attendants in accordance with the order of assignment provisions of this Agreement as provided for in Section 8 of this Agreement.
 4. A Flight Attendant who volunteers, or is assigned to fly a Geographic Emergency flight, will receive per diem, in accordance with Section 5 of this Agreement, lodging and transportation, and will receive a fifty dollar (\$50) bonus for each overnight that she/he is away from domicile.
